

New HP Healthcare Printing Solutions (October 2008)

- HP Document Capture for Admission and Electronic Medical Records Solution
- HP Patient Identification Printing Solution

Overview

HP's latest solutions for the healthcare industry were designed to help reduce medical errors and boost patient safety. Powered by HP single and multifunction printers (MFPs), the solutions announced October 2008 help healthcare professionals deliver more efficient, reliable and up-to-date care for patients. These offerings are designed to safely capture and protect patient medical information so healthcare organizations are able to comply more easily with government mandates, including patient-privacy regulations.

HP Document Capture for Admissions and Electronic Medical Records

The HP Document Capture for Admissions and Electronic Medical Records Solution provides healthcare facilities with scalable, easy-to-use technology that saves time on capturing and processing documents, reduces medical errors and increases patient safety. By implementing the HP Document Capture for Admissions and Electronic Medical Records Solution, organizations can:

- Scan and route important medical records into a selected medical record system to accelerate reimbursement time from insurance companies and government agencies
- Print bar codes with patient metadata on admissions forms and other documents, consolidating patient information in an accurate and private method that can then automatically route the information to the appropriate patient files
- Permit only authorized staff to access private medical records, thereby supporting government compliance directives for authentication capabilities

The HP Document Capture for Admissions and Electronic Medical Records Solution is compatible with HP MFPs.

HP Patient Identification Printing

Confidently print a complete patient admission packet including optimal ID wristbands, privacy notices, consent forms, bar-coded labels and time-sensitive and private documents with the HP Patient Identification Printing Solution. The comprehensive, end-to-end solution provides quality of care through integrated workflow and printing solutions – from the patient to the pharmacy to the lab. By implementing the HP Patient Identification Printing Solution, organizations can:

- Help to diminish human error and increase patient safety with data-rich ID wristbands that contains several options including color photos and color-coded icons or shapes to
